EDUCATION

> B-tech in CSE

Maulana Abul Kalam Azad University
2024-2028

> Higher Secondary

West Bengal Council of Higher Secondary
Education (WBCHSE)
2022 - 2024

> Secondary Education

West Bengal Board of Secondary Education
(WBBSE)
2020-2022

SKILLS

- Full Stack Developer
- UI/UX
- Android Developer
- IOT

MY PROJECT

Digital Simulation Platform

Built a web-based Digital Circuit Simulator that demonstrates logic gates, adders, decoders, multiplexers, comparators, and ALU operations with interactive inputs, real-time outputs, truth tables, and Boolean logic visualization

A platform for farmers of all areas

Developed GreenRoots, an AI and IoT-based smart farming platform providing crop recommendations, pest detection, weather alerts, and market price tracking. Integrates IoT sensors for real-time farm monitoring and an AI assistant for data-driven farming decisions.

A diary app for notes or journaling

Developed EchoDiary, a privacy-focused Android journaling app with voice notes, multimedia entries, customizable themes, and secure local storage. Features include passcode protection, reminders, calendar view, and offline-first design with no data collection

An IoT-based Gaming Console

As a hobby project, I built a one-button premium arcade helicopter game completely from scratch using ESP32, a 1.8" TFT display, a push button, and a buzzer.

The project focuses on real-time graphics, smooth input handling, sound effects, and a simple yet colorful UI designed for low-resource hardware.
